## ORIENTAL ORCHIDS OF THE GARDEN

(IRIS KAEMPFERI)  
Your garden is not complete until you have this beautiful flower growing in your perennial collection. Now you can grow your own Orchids by planting Iris Kaempferi, which is entirely different from all other Iris and comes into bloom as the early summer fades, continuing to bloom until mid-July. The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempferi is called the "Orchid of the Garden." Excellent for cutting. It will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is fatal to select a location where water stands during winter).

# THE BEST FROM THE HEART OF THE OZARKS! BIG JUICY STRAWBERRIES

**Important Notice!**  
A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the spring for Red Stele disease and once in the fall for all kinds of insects and diseases that attack strawberries. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

**TWO BRAND NEW STRAWBERRIES**  
**NEWARMORE**—Most recent introduction by University of Missouri, Blakemore X Aroma cross. Large size, firm fruit, which is dark red all the way through. All the flowers will mature fruit, and will hold size well until end of season. Ripens 10 days later than Premier. All reports from growers are very enthusiastic. We believe this berry will become a great commercial variety.

It is both a many shrub, and a great fruit producer — the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry ever known. It is a rich yellow color and when fully ripe has a rich golden yellow. It is truly a novelty shrub for your garden — the most unusual feature of this new variety is that after the first frost the canes turn a rich yellow color, which is very outstanding during the winter months. The fruit can be eaten fresh or can also be successfully preserved; again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. **NEW BLUE BERRIES**  
GROW YOUR OWN BLUEBERRIES—THEY'RE FRESH OFF THE BUSH  
Cultivated Blueberries are rarely shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental all year.  
As a commercial proposition it is one of the most profitable fruits to grow. There is a big market. They make good money in a very short time, for you can begin picking the second or third season after planting.  
Choose piece of ground easily supplied with moisture during dry summer months; it should not, however, at any time become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, not over 2 to 3 inches deep, so as to leave the roots undisturbed.  
**CONCORD**. Bush of upright habit at maturity exceeding 6 feet in height. The berries are large.  
**JERSEY**. Very large and vigorous in habit. The light blue berries are very large.  
2-Yr. 12 to 18 in.  
\$1.98 \$5.50 \$9.50 \$16.00  
We recommend ordering both varieties so they will cross-pollinate and fruit freely.

**HYBRID PERSIMMONS**  
2 to 3 feet—\$1.99  
Some of these should be planted by every family. The fruit often measures ten inches in circumference, they ripen in August, September and October. The trees bear young, and are very ornamental.  
**EUREKA**—Very large, oblong, pointed flesh yellow, skin red.  
**TANE NASHI**—A large acorn-shaped seedless persimmon, pale yellow and very productive. This is the persimmon you see in most stores selling at 5 cents each. It is frost resistant and widely adapted.

The numerous small white tinged pink flowers resemble miniature Arbutus, having comparatively deep, slender throats through the individual flower is only about three-quarters of an inch in length. **BOXWOOD** (*Buxus sempervirens*)—Everyone is familiar with Boxwood and its good qualities. There is hardly a plant that can be used in quite so many positions. **BEWARE OF FROST:** Nursery stock received during frosty weather should be placed in a cool cellar or some such place, and allowed to thaw out gradually. The plants can then be unpacked for planting or be stored under proper conditions. There will be no damage to stock if handled properly when received.
